NEED HELP, HELP STUDY ING FOR UP- GRADE. GET IN TOUCH JOHN, WB2AUL,HE MIGHT BE ABLE TO HELP YOU

STUDY AND PASS YOUR EXAM. 914-969-6548

Nick Messina N2XBR – 5K

On January 25, 2013 a fellow ham and very good friend passed away after struggling with several illnesses over the past few years. Nick – N2XBR was a past YARC member and board member. I met Nick on the CB 25 years ago and we quickly became good friends. Through the years we worked together at Sears, played music together in a band and became Amateur Radio operators together. Nick was the epitome of a “good guy.” Before he became ill he was always willing to help out. He would help other hams put up antennas or volunteer his truck to transport equipment to field day or pick up equipment for our repeater site. Over the past few years Nick did not have the strength to participate in club activities, but he was always listening. He was also a family man leaving behind his wife and two sons. Hopefully one day his sons will share their father’s interest ham in radio. Nick was a good guy, a good father, a good ham and a good friend and he will be missed.

GUEST SPEAKER-----

AT THE MARCH MEETING, DAVE N2EHG WILL BE GIVING A TALK ON AMPLIFIERS, HF AND THE DIFFERENT TYPE THAT ARE OUT THERE AND WHAT IS NEEDED TO SET UP ONE IN YOUR SHACK. I LEFT THE FEB.. TECH NOTE IN THIS ISSUE SO PLEASE READ IT AND AT THE PRESENTATION ASK QUESTIONS.

TECHNICAL CORNER

Raspberry Pi

The Raspberry Pi is a full-fledged computer that comes on a board a little bigger than a credit card. Originally designed as an educational tool it has become popular with the hobbyist community. The unit has a 700 MHz ARM processor, 512 MB of Ram, 2 USB ports, one Ethernet port, an HDMI port, a composite RCA port, a slot for an SD memory card and the unit is powered by a micro USB cell phone charger. There is also a set of I/O pins that can be programmed to control external devices using the Python programming language. You can check out <http://www.raspberrypi.org> for more info on the Raspberry Pi.

I originally stumbled across the Raspberry Pi following a link from the DIY section of Radio Shack's website. I thought it would be a good way to run a server at my house without leaving a regular PC on 24x7. The latest version of the board is 2.0 which has 512 MB of ram on it (previous versions only had 256 MB of ram). The board alone costs \$35, but I ended up adding a case, Wi-Fi network adapter, USB charging cable and a 16 GB SD card with Raspian Wheezy version of Linux pre-installed.

Set up was pretty easy right out of the box. I connected mouse and keyboard to the USB ports. You can connect more USB devices by using a powered USB hub. I connected it to my TV with an HDMI cable and I was up and running.

Below is the Raspberry Pi connected to a 250 GB external Hard Drive and to the TV with a RCA composite cable.

First thing I set up was an SSH (Secure Shell) server so I can connect remotely from another computer using a program called PuTTY which is a free download.

TECHNICAL CORNER

PuTTY allows you to control a remote computer using the Linux command line.

```

pi@raspberrypi ~ $
```

Below is the Raspberry Pi's Windows like desktop which is visible when the device is connected to a TV or remotely using a VNC (Virtual Network Computing) server.

TECHNICAL CORNER

I installed Apache web server and posted a simple website at <http://themaincomputer.net> and I installed an FTP (File Transport Protocol) server so I can access my files from anywhere.

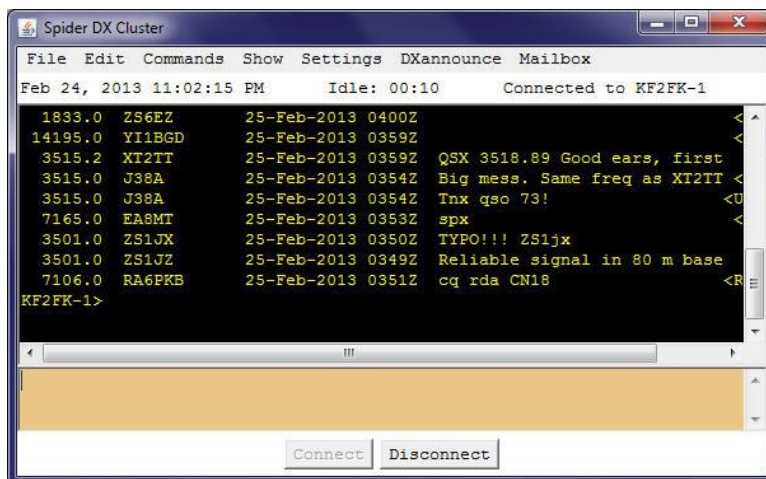

I connected my 250 GB external hard drive to the unit and shared it on my home network using a piece of Linux software called Samba.

TECHNICAL CORNER

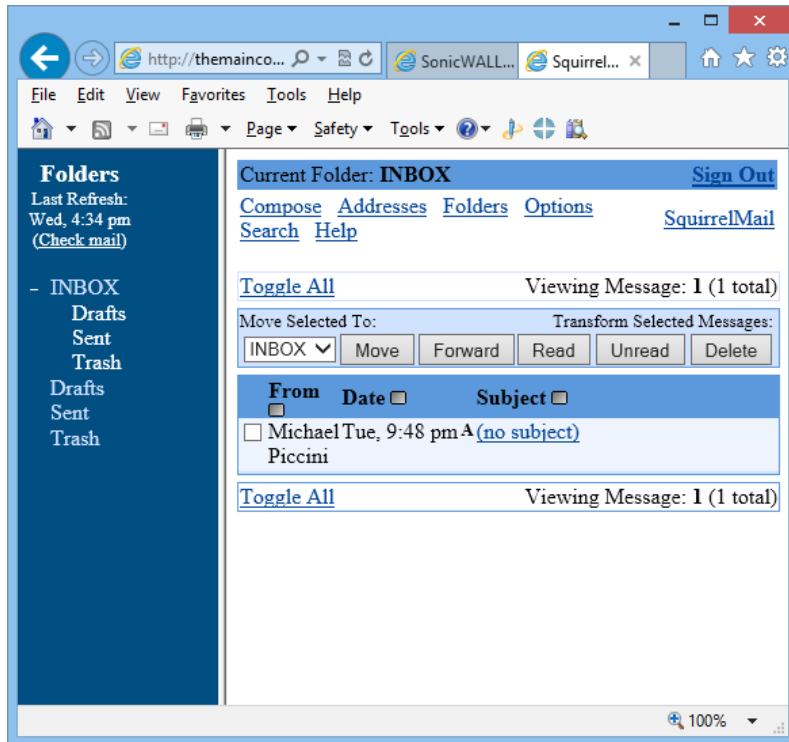

I moved my DX Cluster serve from a Dell PC to the Raspberry Pi and it ran with only a few modifications.

Lastly I set up a mail server complete with web interface. You can send me an email kf2fk@themaincomputer.net

TECHNICAL CORNER

Well that's all the experimenting I have done so far. I will have to do some research to see how this minicomputer can be used in Amateur Radio applications. For now if you have any questions or ideas please email me at kf2fk@aol.com.

73,

Mike – KF2FK
